

NERVE FUNCTION

Many things can impair your nervous system and interfere with its function.

The effects of nervous system dysfunction can be caused by several areas of the spine. Do you know any experiencing:

- Cranial Involvement
 - Cervical Involvement
 - Thoracic Involvement
 - Lumbar Involvement
 - Sacral Involvement
- Headaches
 - Migraine headaches
 - Dizziness
 - Fatigue
 - Head colds
 - Vision problems
 - Hearing
 - Sinus problems
 - Common cold
 - Allergies
 - Runny nose
 - Sore throat
 - Tonsillitis
 - Hoarseness
 - Laryngitis
 - Stiff neck
 - Cough
 - Croup
 - Pain in upper arm
 - Tennis elbow
 - Wrist, hand, and finger numbness
 - Wrist, hand, and finger pain
 - Shortness of breath
 - Difficulty in breathing
 - Asthma
 - Heart conditions
 - Chest pains
 - Pneumonitis
 - Pneumonia, congestion
 - Gallbladder conditions
 - Hiatal hernia
 - Blood pressure problems
 - Liver conditions
 - Jaundice
 - Skin conditions, acne, pimples
 - Stomach troubles
 - Indigestion
 - Heartburn
 - Gastritis
 - Ulcers
 - Blood sugar problems
 - Kidney conditions
 - Gas pains
 - Chronic tiredness
 - Irritable bowel
 - Constipation, diarrhea
 - Hernias
 - Sterility, bladder problems
 - Menstrual problems, cramps
 - Bed wetting
 - Knee pains
 - Sciatica
 - Low back pain
 - Difficult or painful urination
 - Numbness, poor circulation in legs
 - Shin splints
 - Swollen ankles, weak arches
 - Leg cramps, cold feet
 - Sacroiliac problems
 - Hemorrhoids
 - Pain at end of spine

PLEXUS The major Plexuses serve as "junction boxes" to collect and distribute nerve impulses from the central nervous system.

* The cranial nerves are part of the brain stem, which extends down into the cervical spine.

Due to the complexity of the nervous system only the most basic anatomical and physiological relationships are shown.
